*Decision-support only. Not legal advice.*

## Findings

### **leads.email RET-01 FAIL Art. 5(1)(e), Art. 30(1)(f)**

Missing retention period

Declare a retention period with a trigger event for this personal-data field, then record it on the ROPA.

### **leads.email RET-05 PARTIAL Art. 5(1)(e)**

No disposal action

Record whether the field is erased or anonymised when the period ends.

### **leads.email RET-06 FAIL Art. 17**

Erasure not supported

Confirm the field can be deleted or put beyond use so Article 17 requests can be met.

### **leads.email RET-08 PARTIAL Art. 30**

No ROPA activity link

Map the field to an Article 30 processing activity id so the schema and the ROPA stay aligned.

### **leads.source\_notes RET-02 FAIL Art. 5(1)(e), Art. 30(1)(f)**

Vague retention period

Replace pointers such as 'as per policy' with a concrete period and trigger (for example '30 days after last contact').

### **leads.source\_notes RET-05 PARTIAL Art. 5(1)(e)**

No disposal action

Record whether the field is erased or anonymised when the period ends.

### **leads.source\_notes RET-06 FAIL Art. 17**

Erasure not supported

Confirm the field can be deleted or put beyond use so Article 17 requests can be met.

### **leads.source\_notes RET-08 PARTIAL Art. 30**

No ROPA activity link

Map the field to an Article 30 processing activity id so the schema and the ROPA stay aligned.

### **session\_replays.blob RET-03 PARTIAL Art. 5(1)(e)**

No trigger event

State when the clock starts (end of employment, last appointment, account closure), not only a duration.

### **session\_replays.blob RET-04 PARTIAL Art. 5(1)(e)**

Retention not enforced

Add an automated deletion or anonymisation job so the declared period is kept in practice.

### **session\_replays.blob RET-06 FAIL Art. 17**

Erasure not supported

Confirm the field can be deleted or put beyond use so Article 17 requests can be met.

### **session\_replays.blob RET-08 PARTIAL Art. 30**

No ROPA activity link

Map the field to an Article 30 processing activity id so the schema and the ROPA stay aligned.
